

Fabricated Steel Benefits

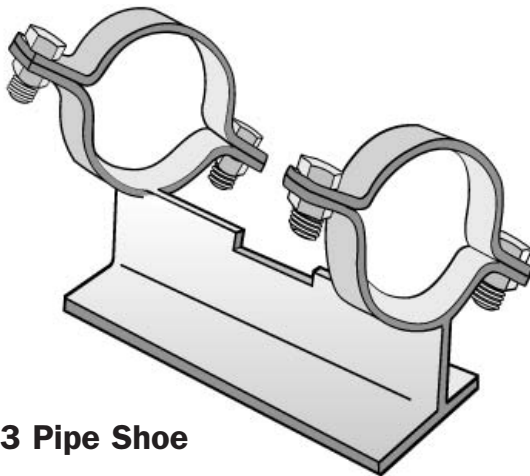

Industrial Material Corp. (IMC) helps its Customers save time, reduce cost, and more. IMC fabricates products for all phases of your project, including embeds, angle clips, pipe shoes and instrument stands. Industrial Material is also experienced and capable in larger structures like platforms, pipe racks, and skids.

Angle Clip

S3 Pipe Shoe

**Type 5 Wall Mount
Instrumentation Support**

Compared to field fabrication, IMC profits you in many ways. We can reduce your total cost by minimizing field labor expense, purchasing expenditures, material waste and coating costs. Also, utilizing Computer Aided Drafting (CAD), IMC can provide faster delivery, improved quality, and finer fit and finish.

IMC has no minimum order; provides 24-hour, 7-day service; and purchases steel and other goods mill-direct. Our blast and coat facilities improve control and reliability in the procurement of paint and/or coated fabrication.
