

INDUSTRIAL BLASTING, PAINTING AND COATING

For over twenty years, Industrial Material Corp. has provided industry abrasive blasting and coating.

Industrial Material Corporation (IMC) provides abrasive blasting and coating to extend the life of equipment, improve identification, enhance appearance, and more.

QUALITY

IMC's quality improvement process began in 1988. In blasting and coating our trained employees document their work, including NACE certified inspection.

MANAGING TIME-CRITICAL PROJECTS

Industrial Material has the knowledge, skills and desire to keep fast-paced projects on track. IMC is prepared to help 24 hours a day, seven days a week.

FACILITIES AND EQUIPMENT

IMC's three-plus acre Coating Facility has 15,125 square feet of enclosed floor space, with up to 35 ton lifting capacity. IMC's facilities are registered with Texas Commission on Environmental Quality (TCEQ).

Industrial Material Corp. also provides "turn-key" painted, fabricated, and/or stock length material. IMC can provide delivery with its fleet of trucks in the Houston Gulf Coast region.

Industrial Materials blast and coat facilities improve reliability and speed in the procurement of painted and/or coated material or fabrication.
